Explanations on major accounting information and financial indicators of the Company:

The decreases in net profit attributable to shareholders of the Company and net profit attributable to shareholders of the Company after deducting extraordinary profit and loss were mainly due to the combined effect of the COVID-19 pandemic and the increase in the price of certain raw materials in the supply chain, which resulted in a year-on-year decrease in the gross profit of the Company's green service-oriented electronic manufacturing service during the Reporting Period. In addition, the Company actively fulfilled its corporate social responsibility by granting partial rent reductions to tenants of small and micro enterprises and individual industrial and commercial businesses engaged in production and operation activities, resulting in a year-on-year decrease in profit from leasing business during the Reporting Period.

III. MANAGEMENT DISCUSSION AND ANALYSIS

3.1 The discussion and analysis on the operation

In the first half of 2022, the Company's overall operating results declined in the face of a complex situation in which risks and challenges increased significantly in various areas, mainly due to the combined effect of the COVID-19 pandemic and the increase in the price of certain raw materials in the supply chain, which resulted in a year-on-year decrease in the gross profit of the Company's green service-oriented electronic manufacturing service during the Reporting Period. In addition, the Company actively fulfilled its corporate social responsibility, reduced and exempted part of the rent for the tenants of small and micro enterprises and individual industrial and commercial businesses engaged in production and operation activities, resulting in a year-on-year decrease in profit from leasing business during the Reporting Period. The Company established a sound organizational system, strengthened quality and efficiency, and practically prevented risks by continuously focusing on key reform tasks, promoting special work on the governance of loss-making enterprises and digital transformation, optimizing the talent structure, increasing research and development efforts, systematically promoting the establishment of a "five-in-one" risk control system, including risks, rule of law, compliance, internal control and accountability to promote the sustainable development of the Company. During the Reporting Period, the Company recorded revenue of RMB2,033,290,900, total profit of RMB33.8662 million and net profit attributable to the parent company of RMB12.0002 million.

Notes:

1. Basis of preparation

Based on going concern and actual transactions and events, the Company prepared financial statements in accordance with the basic and specific standards of the Accounting Standards for Business Enterprises, the Application Guidance for Accounting Standard for Business Enterprises, interpretations of the Accounting Standards for Business Enterprises and other relevant regulations issued by the Ministry of Finance (hereinafter collectively referred to as "CAS"), and the disclosure requirements in the Preparation Convention of Information Disclosure by Companies Offering Securities to the Public No. 15 – General Provisions on Financial Reporting issued by the China Securities Regulatory Commission.

2. Going concern

For the 12 months since the end of the Reporting Period, the Company has ability to continue as a going concern and there is no significant risk affecting its ability to continue as a going concern.

3. Segment information

The Company established 4 reportable segments on the basis of the internal organisational structure, management requirement and internal report system, namely, smart transportation and safe city, green and service-oriented electronic manufacturing, industrial internet and intelligent manufacturing and others. Each segment provides different products and service, or engages in business operations from different areas. Due to the different demands of each segment for different technology and marketing strategy, the Company's management monitor the different segments in respect of their business activities separately, and evaluate the operating results on a regular basis in order to allocate resources and evaluate its performance.

The transfer price between different segments is based on the actual transaction price, and the costs which shall be jointly assumed by each segment is allocated in proportion. Assets are allocated in accordance with business operations of various segments and the location where such assets are situated. Segment liabilities includes the liabilities incurred for business activities of a segment which shall be assumed on its own. If the costs related to a joint liability involving certain operating segments, the liability and relevant costs would be allocated to such segments in proportion.

Non-current assets are classified according to the areas where the assets belong. All the non-current assets of the Company are located in the China Mainland.
